## Industrial Growth

Living in a forest it is sometimes difficult to see wood for trees. Much the same can be said about the industrial growth of Edmonton. We who live among it all are apt to take no notice of the importance of this industrial growth, and never will do until it begins to engulf us.

#### Veiled Threats

The careless statement of a Laborite member of the British Parliament is the latest on the part of a small section over there to blame everyone but themselves for their troubles.

Fortunately responsible opinion does not agree with such statements as those made by Ernest Kinghorn, and there never would be any danger of British switching sections.

In such a case, while his action does not justify a charge of manslaughter, it certainly does call for some form of punishment as being a contributory cause of the accident through negligence on his part. The four of them—Derrett, Hume, Petrie and Nairn—are built like football tackles. And for all we know that's exactly what Nairn was in his playing days.
